Dear Mr Ford

CONSULTATION ON THE NORTH CLAINES REGULATION 16 NEIGHBOURHOOD PLAN

Thank you for your consultation. Our comments remain substantively the same as those expressed in our earlier correspondence (10th December 2015) that is:

“Historic England are supportive of the plans policies for the historic environment and the overall content of the document, particularly the emphasis on local distinctiveness and the heritage assets of the Parish and the comprehensive approach taken to the conservation of historic landscapes, including making use of the County Council’s Landscape Character Assessment. We also highly commend the approaches taken in the Plan to ensuring that the design of new development contributes to the conservation and enhancement of the historic environment”.

We have no other substantive comment to make but in conclusion Historic England consider the North Claines Neighbourhood Plan to be a well-considered, concise and fit for purpose document that effectively embraces the ethos of “constructive conservation”.

I hope you find these comments and advice helpful. If you have any queries please do not hesitate to contact me.

Yours sincerely,

[REDACTED]
Peter Boland
