Subject: South West Worcestershire Plan Feedback

CAUTION: This email came from outside of the South Worcestershire councils IT network - only open links and attachments you're expecting.

Dear Sir,

The plan does not represent sustainable development because hospitals and local services are exhausted in Worcester. Roads are full, hospitals cannot cope, ambulance service is over stretched. Doctors surgeries are full. More houses and new villages will impact on this even more.

The plan is not justified as this is a strategy to attract people to the area rather than provide needed housing by existing local families.

It is not effective because local facilities cannot cope now, the local population of the area does not require housing of this scale.

This development is a way for Wychavon and Malvern to build significant housing developments outside of their local area.

Thank you,

Gary Margerison
